

Food Safety

Contact: A.Q. Armstrong, armstrongaq@ornl.gov, 865.576.1555

Sponsor: LSD/PD

- **Objective:** In collaboration with UT, research and creation of a systems approach to identify and develop methods and data to address food borne health threats.
- **Conclusion:** Development of “farm to fork” integrated pathogen transmission models will identify control points and improve food safety
- Development of dose/response models for food borne pathogens
- Research residual pesticide quantification, antibiotic resistance, health tolerance levels, and improved detection methods
